Minnesota Department of Education

Minnesota Colleges offering Career and Technical Education (CTE) courses to eligible 10th graders through the Postsecondary Enrollment Options program (PSEO)

New legislation passed under Minnesota Statutes, section 124D.09, allows eligible 10th grade students to enroll in one Career and Technical Education (CTE) course. In order to be eligible, a 10th grade student must have taken the 8th grade MCA reading test in the 8th grade and have met the composite proficiency level of "meets or exceeds". If the student meets this standard, they may be eligible to enroll in CTE courses, as identified by the Minnesota State College and University System (MnSCU) if they meet the specific course requirements and pre-requisites of the CTE courses(s) they wish to enroll in. This option is open to Minnesota public school students. Interested students who are enrolled in a district or an American Indian-controlled tribal contract school should contact the eligible postsecondary institution to find out what Career and Technical Education courses they offer and what the application process is at their college.

Visit the Minnesota State College and University (MnSCU) web site to find the college that offers the career and technical programs you are interested in.

View the MNSCU policy and procedures for PSEO.
