Minnesota Department of Education

Food Production Records:

Food Production Record—Daily

This form is used by sponsors that are approved for two meals and one snack served daily (Breakfast, Lunch, Snack).

Food Production Record—Daily

This form is used by sponsors that have been approved for three meals (Breakfast, Lunch, Supper). Also, this record can be used by food vendors providing more than one meal to a sponsor's site.

Food Production Record—Weekly

Record breakfast, lunch and one snack daily. This is the most popular food production record utilized by sponsors that prepare breakfast, lunch and PM snack on site Monday through Friday. This recording document may be used as the dated menus. (With instructions).

Food Production Record—Two Meals

This type of record is used by emergency shelters due to the uncertainty of the need for meal preparation throughout the day.

Food Production Record—Daily, Breakfast

This type of record is generally completed by the food vendor to document the total prepared breakfast items, the number of servings prepared for various groups or age levels and a portion guide for serving to participants. Commonly, the food vendor may give a copy to the sponsor with the delivery of prepared breakfast items each day. Sponsor will keep the record on file. (With instructions).

Food Production Record—Weekly, Breakfast

This style of food production record is primarily used at facilities where breakfast is prepared on site; the lunch is supplied by a food vendor who completes a food production record for the meals they are contracted to supply. The form is used by the sponsor to document breakfast items prepared on site Monday through Friday.

Food Production Record—Monthly, Breakfast

This type of record is primarily used when the sponsor prepares their own breakfast and the lunch/supper is prepared from a food vendor. For snacks the center can use dated menus.

Food Production Record—Daily, Lunch/Supper

Food vendors will typically complete this form and give to a sponsor or site staff when food is delivered each day. Sponsors will keep the records on file. Sponsors may use this type of form if they want more space to document food items prepared. (With instructions).

FOOD PRODUCTION RECORD—Daily

Cycle Week (Number)/Day _____ DATE_____

Breakfast Required Components	Specific Food Served	Planned Portion Size	Quantity Prepared (weight or measure)
1. Grains/Breads			
2. Fruit or 100% Juice or Vegetable			
3. Milk			
Additional Foods are Optional			
		Number of servings prepared or Participants/Staff Served:

Food Production Record—Weekly Instructions

1. Write the date the menu was served, showing month, day and year.
2. Record all creditable food items served in the appropriate sections under Food Item. For a menu item such as tuna pea casserole, write each food component in the appropriate section, e.g., write tuna in the meat/meat alternate section, peas in the fruit/vegetable section, and noodles in grains/breads alternate section.
3. Enter the quantity of each food item prepared in the appropriate section under Quantity. Be specific. Use weights, measures, or numbers, e.g., beef, 10 pounds; potatoes, three pounds; milk, one gallon, etc.
4. Enter the number of children and adult servings planned for at each meal.
